## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 22-30, drawn to methods of reducing tumor cell proliferation, classified in class 514, subclass 2 or class 424, subclass 130.1.
  - II. Claims 31-38, drawn to methods of diagnosis or prognosis of cancer, classified in class 436, subclass 64.
  - III. Claims 39-43, drawn to methods for purifying or isolating a P or A-type substance, classified in class 536, subclass 1.11.

2. The inventions are distinct, each from the other, for the following reasons:

Groups I, II and III are drawn to separate and distinct methods. Although there are no provisions under the section for "Relationship of Inventions" in MPEP 806.05 for inventive groups that are directed to different methods, restriction is deemed to be proper because these methods constitute distinct inventions for the following reasons: Group I is drawn to methods comprising the use of an inositolphosphoglycan antagonist, whereas Group II is drawn to methods for diagnosis or prognosis of cancer comprising the detection inositolphosphoglycans, and Group III is drawn to methods for purification comprising the use of microcrystalline cellulose. Thus, groups I, II and III are separate and distinct methods because they comprise different method steps, and use different products. Further, it would place an undue burden on the examiner to examine several, independent inventions in one application.

Art Unit: 1642

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
